

Protecta FR Acrylic - Concrete Wall Single-sided Gap

Installation Instructions

1. Before installing Protecta® FR Acrylic ensure that the surface of all service penetrations and surrounding construction is free from all loose contaminants, dust and grease.
2. Where Protecta® FR Acrylic is to be installed against surfaces that cannot tolerate direct contact; appropriate surface preparation should be made (contact Polyseam for guidance in these cases). For paints sensitive to sealing compounds, priming with a PVA primer is recommended.
3. When installing any backing material, cut this slightly oversize and insert into the gap ensuring a tight friction fit. Ensure correct depth is achieved.
4. Fill the gap or joint with Protecta® FR Acrylic to the required depth.
5. Apply the sealant generously to prevent air bubbles. Finish the bead with a moist spatula, pallet knife or brush.
6. Protecta® FR Acrylic can be over-painted with most emulsion or alkyd (gloss) paints.

FPA Register / System ID# FC111

| | |
|---------------------|---|
| Products | Protecta FR Acrylic Stone wool |
| Application | Fire rated linear seals in rigid walls or between wall and floor |
| Construction | Minimum wall thickness of 150mm and comprise concrete, aerated concrete or masonry, with a density of $\geq 650 \text{ kg/m}^3$ |

Fire & Sound classification

Horizontal seal depth 25mm, max width 30mm, stonewool 40kg/m^3 20mm deep FRR -/240/60 or stonewool 40kg/m^3 48mm deep FRR -/240/120

Horizontal seal depth 10mm, max width 50mm, stonewool 33kg/m^3 60mm deep FRR -/240/60

Vertical seal depth 10mm, max width 50mm, stonewool 33kg/m^3 60mm deep FRR -/120/120

Wall thickness reduced to 75mm permitted with FRR of seal reduced to FRR of wall.

ZERO smoke leakage up to 200Pa

Sound reduction (seal only) STC 62
