

Protecta FR Acrylic - Concrete Wall 100mm Conduit (Flexible or Rigid)

Installation Instructions

1. Before installing Protecta® FR Acrylic ensure that the surface of all service penetrations and surrounding construction is free from all loose contaminants, dust and grease.
2. Where Protecta® FR Acrylic is to be installed against surfaces that cannot tolerate direct contact; appropriate surface preparation should be made (contact Polyseam for guidance in these cases). For paints sensitive to sealing compounds, priming with a PVA primer is recommended.
3. When installing any backing material, cut this slightly oversize and insert into the gap ensuring a tight friction fit. Ensure correct depth is achieved.
4. Fill the gap or joint with Protecta® FR Acrylic to the required depth.
5. Apply the sealant generously to prevent air bubbles. Finish the bead with a moist spatula, pallet knife or brush.
6. Protecta® FR Acrylic can be over-painted with most emulsion or alkyd (gloss) paints.

System/FPA Register ID# FC467

Products	Protecta FR Acrylic
Application	Fire stopping of flexible or rigid plastic conduits in rigid walls
Construction	Minimum wall thickness of 100mm comprised of concrete, aerated concrete or masonry, with a density of $\geq 650 \text{ kg/m}^3$

Fire & Sound Classification

PVC, PVC-U, PVC-C conduit up to 40mm with wall thickness up to 1.9mm FRR -/120/120

PE, PE-HD, PEX conduit up to 40mm with wall thickness up to 3.0mm FRR -/90/90

PP, PP-R, PP-H conduit up to 40mm with wall thickness up to 2.2mm FRR -/90/90

Conduit may be fully or partially filled with cables up to 21mm diameter

ZERO smoke leakage up to 200Pa

Sound reduction (seal only) STC 62
